

OKS 277 High-Pressure Lubrication Paste, with PTFE

Description

High-pressure lubrication paste with PTFE for the lubrication of sliding machine elements made of metal, plastic and ceramic.

Applications

- Lubricating and sealing off tap cocks, labyrinth seals, stuffing boxes and packings
- Lubricating and sealing off fittings made of metal, plastic and ceramic, e.g. drain, cold- and hot-water fittings
- Long-term lubrication of heavily loaded press and guide plates, for example on telescope booms of mobile cranes
- As a lubricant for of threaded spindles on radiator thermostats

Branches

- Plant and machine (tool) engineering
- Glass and foundry industry
- Iron and steel industry
- Rail vehicle technology
- Rubber and plastic processing
- Paper and packaging industry
- Chemical industry
- Municipal services
- Logistics
- Shipbuilding and marine technology

Application tips

For optimum adhesion, clean contamination and other lubricants from slide surfaces. Best way is to clean mechanically first and then with OKS 2610/OKS 2611 universal cleaner. Apply sufficient paste evenly with a brush, spatula, etc. The paste will also act as a sealant. Do not use paste instead of grease and mix only with suitable lubricants.

Packaging

• 1 kg Can

• 25 kg Hobbock

Advantages and benefits

- Reduces wear
- Extension of the relubrication intervals
- High resistance to oxidation
- Noise and vibration-damping
- Resistant to cold and hot water, water vapour, lactic, formic, acetic and fruit acid, as well as alkaline and acidic cleaning agents and disinfectants
- Good elastomer and plastic compatibility

OKS 277 High-Pressure Lubrication Paste, with PTFE

Technical data

	Standard	Conditions	Unit	Value	
Main components					
base oil				ester	
thickener				PTFE	
Application related technica	al data				
viscosity (at 40°C)	DIN 51 562-1		mm²/s	5,000	
viscosity at (100°C)	DIN 51 562-1		mm²/s	340	
drop point	DIN ISO 2176		°C	without	
unworked penetration	DIN ISO 2137	no shear stress	0.1 mm	220-250	
lower operating temperature			°C	-20	
upper operating temperature			°C	150	
colour				white	
density (at 20°C)	DIN 51 757		g/cm³	1.2	
four-ball test rig welding load	DIN 51 350-4		Ν	2,200	
Properties and approvals
