# OKS 1010/2
Silicone Oil, 1000 cSt

Description

OKS 1010/2 is a silicone oil, highly suited as lubricant and parting agent for plastics and elastomers.

Applications

- Parting agent at foundry operations injection moulding, blowing and extruding processes of plastics and elastomer
- Avoids the sticking of e.g. adhesives and sealing excess or water wetting
- Sliding agent against noisy rubbing of plastics, elastomers and metals together or against each other
- Lubrication of cutting edges in the paper, cardboard, veneer layer and textile processing machines
- For easy retracting of plastic and rubber profiles, e.g. in the door and window production

Branches

- Catering equipment and food processing technology
- Rubber and plastic processing
- Glass and foundry industry
- Chemical industry
- Logistics
- Iron and steel industry
- Plant and machine (tool) engineering
- Rail vehicle technology
- Paper and packaging industry
- Municipal services
- Shipbuilding and marine technology

Advantages and benefits

- High efficiency because of excellent netting of the surface and building of extremely thin lubricating films
- Separating effect with antistatic properties
- Manifold applications for permanent lubrication, protection, maintaining and impregnation
- Neutral behaviour against plastic and elastomers
- Resistant against water and atmospheric influences
- NSF H1-registered
- MOSH/MOAH-free (as per recipe)

Application tips

For best results clean the surfaces first mechanically and then with OKS 2610/OKS 2611 Universal Cleaner. Apply the product with a brush, drip oiler or by dipping evenly thin. Avoid excess. Mix with appropriate lubricants only. Silicone based plastics, e.g. silicone rubber could be affected through the silicone oil. At sliding areas with pure oxygen the application of silicone oil is not allowed. Turbidity cannot be excluded. Turbidity does not have any influence on the quality of the product.

OKS 1010/2
Silicone Oil, 1000 cSt

Packaging

- 1 l Bottle
- 5 l Canister
- 25 l Canister

Technical data

	Standard	Conditions	Unit	Value
Main components				
base oil				polydimethylsiloxane
Application related technical data				
viscosity at (25°C)	DIN 51 562-1		mm²/s	1,000
pour point	DIN ISO 3016	3°C step	°C	< -50
flashing point	DIN ISO 2592	> 79	°C	> 280
lower operating temperature			°C	-55
upper operating temperature			°C	200
colour				transparent
density (at 20°C)	DIN EN ISO 3838		g/cm³	0.97
Properties and approvals				
UFI				
approval for food processing technology				NSF H1, Reg.-Nr. 135921
