

OKS 491 Open Gear Spray, dry

Description

OKS 491 is an open gear spray for dry lubrication of slowly-turning, open pinion gears and steel cables etc. subjected to high pressures, dust or corrosive influences, such as outdoor weathering.

Applications

- Lubrication of open pinion gears which are highly subject to wearing due to corrosion and continuous soiling, e.g. on construction machines, spindle presses, crushers, mills, windlasses, rubbish disposal devices, ship's lifting jaws or water structures
- Wire cables subject to outdoor weathering, e.g. on crane systems, lifts and aerial tramways, ship's and offshore equipment for diverse types of sealing lubrication, including of coarse chains and chain transporters

Branches

- Rail vehicle technology
- Paper and packaging industry
- Shipbuilding and marine technology
- Chemical industry
- Glass and foundry industry
- Iron and steel industry
- Logistics
- Plant and machine (tool) engineering
- Rubber and plastic processing
- Municipal services

Application tips

For highest effectiveness, carefully clean the unstressed lubrication point, e.g. with OKS 2610 or OKS 2611 universal cleaner. Shake well before use. Spray from 20 - 30 cm distance to the prepared surface. The gear- and machine manufacturer's instructions should be observed. Assess the lubrication frequency and quantity on basis of service conditions. Only mix with suitable lubricants.

Packaging

- 400 ml Spray

Advantages and benefits

- Highly effective due to outstanding wetting and lubricating properties
- Decreased friction and wear, and therefore reduction of necessary repair times
- Economical due to thrifty consumption as a result of small application quantities and time-saving use due to advantageous spray form
- Dry, elastic film with high adhesive strength prevents adhesion of dust and dirt
- Waterproof and has good corrosion protection properties

OKS 491 Open Gear Spray, dry

Technical data

| | Standard | Conditions | Unit | Value |
|---|-------------------|--------------|-------------------|---------------------|
| Main components | | | | |
| binder | | | | natural resins |
| solvent | | | | white spirit |
| solid lubricants | | | | bitumen |
| solid lubricants | | | | graphite |
| share of solid lubricants | DIN 51 814 | | percent in weight | approx. 60 |
| Application related technical data | | | | |
| lower operating temperature | | | °C | -30 |
| upper operating temperature | | | °C | 100 |
| optimal layer thickness | DIN 50 981/50 984 | DIN 50 982-2 | µm | 50 |
| drying time | | 20°C | min | 5-10 |
| colour | | | | black |
| density | DIN EN ISO 3838 | at 20°C | g/cm³ | 0.76 |
| water resistance | DIN 51 807-1 | 90°C | Degree | 1-90 |
| Properties and approvals | | | | |
| UFI | | | | NAW1-20MT-G00S-5VC3 |
