

# OKS 2100 Protective Film for Metals

### Description

Dry and clean protective film fast to handling on a wax basis for metals that can be removed easily and protects against corrosion reliably up to two years.

Advantages and benefits

compatible with all lubricants

• NSF H2 registered (only OKS 2100)

Suitable for all climate zones

No surface discolouration

Waterproof and resistant to weathering

• Also available as spray version OKS 2101

· Highly effective due to good film-forming properties

No degreasing prior to commissioning required, as

· Outstanding corrosion and oxidation protection

### Applications

- Preservation of bare metal surfaces of all kinds, which are stored for longer periods and are subject to effects of weathering (tropics, ocean, industrial atmosphere)
- Ideal on-call and storage protection for spare parts with possibility of direction installation

#### Branches

- Rail vehicle technology
- Rubber and plastic processing
- Glass and foundry industry
- Logistics
- Municipal services
- Shipbuilding and marine technology
- Paper and packaging industry
- Iron and steel industry
- Chemical industry
- Plant and machine (tool) engineering

#### **Application tips**

For optimum effect, clean the surfaces. Best way is to clean mechanically first and then with OKS 2610/OKS 2611 universal cleaner. The surfaces must be bright metal and dry. Stir OKS 2100 thoroughly before use. Apply in an evenly thin film to the prepared surfaces, preferably by spraying or dipping, in individual cases also by brush. Shake OKS 2101 well and spray on evenly. Avoid local excesses. Drying times as specified in the following technical data.

#### Packaging

• 5 l Canister

• 25 | Canister

• 200 l Drum

SO 45001

# OKS 2100 Protective Film for Metals

#### **Technical data**

	Standard	Conditions	Unit	Value
Main components	•			
solvent				solvent
solid lubricants				synthetic wax
additives				corrosion protection
Application related technical da	ata			
flashing point	DIN 51 755 (-2)	<65 (< 5°C) (active ingredient)	°C	39
lower operating temperature			°C	-40
upper operating temperature			°C	70
optimal layer thickness	DIN 50 981/50 984	DIN 50 982-2	μm	50
surface covering			m²∕l	20
processing temperature			°C	20-25
drying time		20°C	min	30
colour				light-coloured
density (at 20°C)	DIN EN ISO 3838		g/cm³	0.78
salt spray test	DIN EN ISO 9227	layer thickness 50 µm	h	> 1,000
Properties and approvals				
UFI				DDQ1-500E-C00N-HA4N
approval for food processing technology				NSF H2, RegNr. 142256
