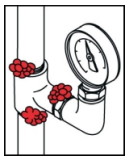
# PRODUCT INFORMATION

a product brand of KLÜBER LUBRICATION

# OKS 2800
## Leak Detector



### Description

Leak detector for locating of leaks on lines, apparatuses and containers under internal pressure.

### Applications

- Piping and hoses, for example steel bottles, compressors, breathing devices, oxyacetylene gas and inert-gas arc welding devices and burners
- Fittings, flanges, valves, screwed connections, soldered and welded connections of pressure gas systems and lines
- Suitable for compressed air, refrigerant, acetylene, butane, natural gas, carbon dioxide, gaseous oxygen, propane, town gas, nitrogen, hydrogen and, ammonia

### Advantages and benefits

- Acts non-corrosive
- Allows direct visual inspection of the leakage point through bubble formation
- Also available as spray version OKS 2801
- OKS 2800 is suitable for use with the OKS Airspray system

### Branches

- Logistics
- Chemical industry
- Iron and steel industry
- Paper and packaging industry
- Glass and foundry industry
- Maintenance and servicing
- Rubber and plastic processing
- Plant and machine (tool) engineering
- Rail vehicle technology
- Shipbuilding and marine technology
- Municipal services

### Application tips

Apply OKS 2800 to the point to be tested by using the Airspray System OKS 5000, hand-sprayer or brush. Spray OKS 2801 on. A leak is indicated by the formation of foam bubbles. Caution: When using on polyamide lines, wash off with water after the test. Protect packaging against frost.

### Packaging

- 5 l Canister
- 25 l Canister
