# **SECTION 4: First aid measures**

### 4.1 Description of first aid measures

If inhaled

 Call a physician or poison control centre immediately. Remove person to fresh air. If signs/symptoms continue, get medical attention. Keep patient warm and at rest. If unconscious, place in recovery position and seek medical advice. Keep respiratory tract clear. If breathing is irregular or stopped, administer artificial respiration.

### **SECTION 5: Firefighting measures**

### 5.1 Extinguishing media

Suitable extinguishing media : ABC powder

Unsuitable extinguishing	: High volume water jet
media	

### 5.2 Special hazards arising from the substance or mixture

Specific hazards during fire- fighting	<ul> <li>Fire Hazard</li> <li>Do not let product enter drains.</li> <li>Contains gas under pressure; may explode if heated.</li> <li>Beware of vapours accumulating to form explosive concentrations.</li> <li>Vapours can accumulate in low areas.</li> </ul>
Hazardous combustion prod- ucts	<ul> <li>Carbon oxides</li> <li>Nitrogen oxides (NOx)</li> <li>Oxides of phosphorus</li> <li>Metal oxides</li> </ul>

### 5.3 Advice for firefighters

Special protective equipment for firefighters	:	In the event of fire, wear self-contained breathing apparatus. Use personal protective equipment. Exposure to decomposi- tion products may be a hazard to health.
Further information		Standard procedure for chemical fires. Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Cool containers/tanks with water spray.

### **SECTION 6:** Accidental release measures

### 6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions	<ul> <li>Evacuate personnel to safe areas.</li> <li>Ensure adequate ventilation.</li> <li>Remove all sources of ignition.</li> <li>Do not breathe vapours or spray mist.</li> <li>Do not breathe dust/ fume/ gas/ mist/ vapours/ spray.</li> <li>Refer to protective measures listed in sections 7 and 8.</li> <li>Only qualified personnel equipped with suitable protective</li> </ul>
	equipment may intervene.

### 6.2 Environmental precautions

Environmental precautions		Do not allow contact with soil, surface or ground water.
		Prevent further leakage or spillage if safe to do so.
		If the product contaminates rivers and lakes or drains inform
		respective authorities.

according to Regulation (EC) No. 1907/2006 - FR (Commission Regulation (EU) 2020/878)

### 6.3 Methods and material for containment and cleaning up

Methods for cleaning up : Contain spillage, and then collect with non-combustible sorbent material, (e.g. sand, earth, diatomaceous earth miculite) and place in container for disposal according t / national regulations (see section 13). Keep in suitable, closed containers for disposal. Non-sparking tools should be used.	i, ver-

# 6.4 Reference to other sections

For personal protection see section 8.

# **SECTION 7: Handling and storage**

# 7.1 Precautions for safe handling

Advice on safe handling :	Do not use in areas without adequate ventilation. Do not breathe vapours or spray mist. In case of insufficient ventilation, wear suitable respiratory equipment. Avoid contact with skin and eyes. For personal protection see section 8. Keep away from fire, sparks and heated surfaces. Persons with a history of skin sensitisation problems or asth- ma, allergies, chronic or recurrent respiratory disease should not be employed in any process in which this mixture is being used. Smoking, eating and drinking should be prohibited in the ap- plication area. Wash hands and face before breaks and immediately after handling the product. Do not get in eyes or mouth or on skin. Do not get on skin or clothing. Do not use sparking tools. These safety instructions also apply to empty packaging whic may still contain product residues. Pressurized container: protect from sunlight and do not ex- pose to temperatures exceeding 50 °C. Do not pierce or burn even after use.	) ch
Hygiene measures :	Wash face, hands and any exposed skin thoroughly after handling.	

### 7.2 Conditions for safe storage, including any incompatibilities

Requirements for storage	:	BEWARE: Aerosol is pressurized. Keep away from direct sun
areas and containers		exposure and temperatures over 50 °C. Do not open by force
		or throw into fire even after use. Do not spray on flames or
		red-hot objects. Store in accordance with the particular na-
		tional regulations.

Handle only in a place equipped with local exhaust (or other appropriate exhaust).

Personal protective equipment			
Eye protection :	Tightly fitting safety goggles		
Hand protection Material : Break through time : Protective index :	butyl-rubber > 10 min Class 1		
Remarks :	Wear protective gloves. The break through time depends amongst other things on the material, the thickness and the type of glove and therefore has to be measured for each case. The selected protective gloves have to satisfy the specifica- tions of Regulation (EU) 2016/425 and the standard EN 374 derived from it.		
Skin and body protection :	Choose body protection in relation to its type, to the concen- tration and amount of dangerous substances, and to the spe- cific work-place.		
Respiratory protection :	Use respiratory protection unless adequate local exhaust ven- tilation is provided or exposure assessment demonstrates that exposures are within recommended exposure guidelines. Short term only		
Filter type :	Filter type A-P		
Protective measures :	The type of protective equipment must be selected according to the concentration and amount of the dangerous substance at the specific workplace.
